

August 30, 2024

Hey Folks,

I hope all is well with everyone. College football has begun and for those of us who suffer from the mental disorder of being a die-hard fan of a losing program, we must endure another season of failure and disappointment. But, alas, hope springs eternal.

GO BIG RED (red as in Nebraska).

Blessings,

Bill

Williamson County Schools

There were no meetings this week and there are none scheduled for next week. For September, there will be three regularly scheduled meetings:

Thursday September 12th is the work session

Monday September 16th is the full board meeting

Monday September 30th is the Policy Committee meeting

There is going to be a special meeting on **September 16th** and this is a meeting that I **recommend people to attend**.

District Family Life Curriculum meeting to be held on September 16th. All Williamson County residents are welcome. Go [Here](#) for details. The actual Tennessee Code is [Code 49-6-1304](#) and it is very explicit.

Williamson County Election Commission

There were no meetings this week and none scheduled for next week.

Williamson County Commission

There were a couple of meetings this week. One was the opioid abatement committee and since these meetings are not recorded, I don't know what went on there. Also, the storm water appeals Board meeting was held.

The month of September looks like [this](#) and next week the most important meeting is the **Budget Committee** which will meet on **Tuesday at 4:30** in the executive conference room in the county building at 1320 W. Main St. This will be the first budget meeting that will be recorded which is a major step to fuller transparency. I don't have their agenda for this meeting but will have more information next week.

Franklin Board of Mayor and Aldermen (BOMA)

There was a work session on the 27th [agenda Video](#) I recommend people to watch the last segment with regards to road impact fees. One of our biggest challenges here in Williamson County is our growth. The more people who come here, the more infrastructure we need and that costs money.

The Board meeting followed the work session [agenda video](#) most of the items on the agenda were consent items so, the meeting only lasted about 11 minutes.

Next week there are three meetings and you can see them [here](#).

If not me, who? If not now, when?
