

COMPREHENSIVE VOTING MODEL

SECURE THE VOTE AT THE SOURCE

Verify the Voter

- 01 Clean voter rolls thoroughly - and more often.
- 02 Neighborhood precincts. Paper registration. No internet.
- 03 No vote centers. No electronic pollbooks.
- 04 Double # precincts. Reduce # voters per precinct.

SECURE THE VOTE AT THE SOURCE

Protect the Ballot

- 05 No ballot-marking devices. No bar-coded ballots.
- 06 Hand-marked paper ballots with currency-grade security.
- 07 Triple the number of privacy voting booths.

EVERY COUNT MUST BE PROVABLE

Prove the Count

- 08 Security Risk Evaluation, hash validation & penetration testing of tabulators before every election.
- 09 Livestream voting and counting while protecting secrecy of voter choices.
- 10 Reconcile every application-to-vote with precinct and tabulator counts.
- 11 Hand-count every ballot post-election to check the accuracy of tabulators.
- 12 Immediately post reports and ballots online for "The People's Audit."

EVERY ELECTION MUST BE PROVABLE

Keep Improving

- 13 Continue Election Commission's performance/operational audits.
- 14 Three days for early voting. Election day a holiday.
- 15 No single vendor supplies, generates, scans, counts and tallies all ballots.
- 16 Ultimately eliminate tabulators.
